**CHAPTER 3
VALUATION RULES**

Valuation rules - preliminary.

13. Subject to paragraphs 25 to 29, the amounts to be included in respect of all items shown in a company's accounts must be determined in accordance with the rules set out in paragraphs 14 to 24.

Fixed Assets General Rules.

14.(1) Subject to any provision for depreciation or diminution in value made in accordance with sub-paragraph (2) or (3), the amount to be included in respect of any fixed asset must be its cost.

(2) In the case of any fixed asset which has a limited useful economic life, the amount of—

(a) its cost; or

(b) where it is estimated that any such asset will have a residual value at the end of the period of its useful economic life, its cost less that estimated residual value;

must be reduced by provisions for depreciation calculated to write off that amount systematically over the period of the asset's useful economic life.

(3) Where a fixed asset investment —

(a) of a description falling to be included under Assets items 7 (Participating interests) or 8 (Shares in group undertakings) in the balance sheet format; or

- (b) any other holding of securities held as a financial fixed asset;

has diminished in value, provisions for diminution in value may be made in respect of it and the amount to be included in respect of it may be reduced accordingly, and provisions made under this paragraph must be charged to the profit and loss account and disclosed separately in a note to the accounts if they have not been shown separately in the profit and loss account.

(4) Provisions for diminution in value must be made in respect of any fixed asset which has diminished in value if the reduction in its value is expected to be permanent (whether its useful economic life is limited or not), and the amount to be included in respect of it must be reduced accordingly, and provisions made under this paragraph must be charged to the profit and loss account and disclosed separately in a note to the accounts if they have not been shown separately in the profit and loss account.

(5) Where the reasons for which any provision was made in accordance with sub-paragraph (3) or (4) have ceased to apply to any extent, that provision must be written back to the extent that it is no longer necessary, and any amounts written back in accordance with this sub-paragraph must be recognised in the profit and loss account and disclosed separately in a note to the accounts if not shown separately in the profit and loss account.

- (6) Subparagraph (5) must not apply to value adjustments made in respect of goodwill.

Development costs.

15.(1) Where this is in accordance with generally accepted accounting principles or practice, development costs may be included under assets item 9 in the balance sheet format.

(2) If any amount is included in a company's balance sheet in respect of development costs, the note on accounting policies must include the following information—

- (a) the period over which the amount of those costs originally capitalised is being or is to be written off; and

Intangible assets.

16.(1) Intangible assets must be written off over the useful economic life of the intangible asset.

(2) Where in exceptional cases the useful life of intangible assets cannot be reliably estimated, such assets must be written off over a period chosen by the directors of the company.

(3) The period referred to in subparagraph (2) must not exceed 10 years.

(4) There must be disclosed in a note to the accounts the period referred to in subparagraph (2) and the reasons for choosing that period.

(5) In this paragraph, intangible assets include goodwill.

Intangible and tangible fixed assets.

17. Assets included in Assets items 9 (Intangible fixed assets) and 10 (Tangible fixed assets) in the balance sheet format must be valued as fixed assets.

Other Fixed assets.

18. Assets falling to be included in the balance sheet, other than those the valuation of which is specifically dealt with in any other paragraph, must be valued as fixed assets where they are intended for use on a continuing basis in the company's activities.

Financial Fixed assets.

19.(1) Debt securities, including fixed income securities, held as financial fixed assets must be included in the balance sheet at an amount equal to their maturity value plus any premium, or less any discount, on their purchase, subject to the following provisions of this paragraph.

(2) The amount included in the balance sheet with respect to such securities purchased at a premium must be reduced at each financial year on a systematic basis so as to write the premium off over the period to the maturity date of the security and the amounts so written off must be charged to the profit and loss account for the relevant financial years.

(3) The amount included in the balance sheet with respect to such securities purchased at a discount must be increased each financial year on a systematic basis so as to extinguish the discount over the period to the maturity date of the security and the amounts by which the amount is increased must be credited to the profit and loss account for the relevant years.

(4) The notes to the accounts must disclose the amount of any un-amortised premium or discount not extinguished which is included in the balance sheet by virtue of sub-paragraph (1).

(5) For the purposes of this paragraph “premium” means any excess of the amount paid for a security over its maturity value and “discount” means any deficit of the amount paid for a security over its maturity value.

Current Assets.

20.(1) Subject to the provisions of sub-paragraphs (2) to (5), the amount to be included in respect of loans and advances, debt or other fixed income securities and equity shares or other variable yield securities not held as financial fixed assets is their cost.

(2) If the net realisable value of any asset referred to in sub-paragraph (1) is lower than its cost, the amount to be included in respect of that asset is the net realisable value.

(3) Where the reasons for which any provision for diminution in value was made in accordance with sub-paragraph (2) have ceased to apply to any extent, that provision must be written back to the extent that the provision is no longer necessary.

(4) Subject to sub-paragraphs (2) and (3), the amount to be included in the balance sheet in respect of transferable securities not held as financial fixed assets may be the higher of their cost or their market value at the balance sheet date.

(5) The difference between the cost of any securities included in the balance sheet at a valuation under sub-paragraph (4) and their market value must be shown (in aggregate) in the notes to the accounts.

Excess of money owed over value received as an asset item.

21.(1) Where the amount repayable of any debt owed by a company is greater than the value of the consideration received in the transaction giving rise to the debt, the amount of the difference may be treated as an asset.

(2) Where any such amount as is provided for in sub-paragraph (1) is treated as that sub-paragraph provides –

- (a) it must be written off by reasonable amounts each year and completely written off before repayment of the debt; and
- (b) if the current amount is not shown as a separate item in the company’s balance sheet it must be disclosed in a note to the accounts.

22.(1) The cost of an asset that has been acquired by the company must be determined by adding to the actual price paid any expenses incidental to its acquisition and then subtracting any incidental reductions in the cost of acquisition.

(2) The cost of an asset constructed by the company must be determined by adding to the purchase price of the raw materials and consumables used the amount of the costs incurred by the company which are directly attributable to the construction of that asset.

(3) In addition to the costs falling within sub-paragraphs (1) and (2), there may be included in the cost of an asset constructed by the company –

- (a) a reasonable proportion of the costs incurred by the company which are only indirectly attributable to the construction of that asset, but only to the extent that they relate to the period of construction; and
- (b) interest on capital borrowed to finance the construction of that asset, to the extent that it accrues in respect of the period of construction;

provided, however, that the inclusion of the interest in determining the cost of that asset and the amount of the interest so included is disclosed in a note to the accounts.

Cost of fungible assets.

23.(1) Subject to the qualification that the method chosen must be one which appears to the directors to be appropriate in the circumstances of the company, the cost of any assets which are fungible assets (including investments) may be determined by the application of any of the methods mentioned in sub-paragraph (2) in relation to any such assets of the same class.

(2) The methods referred to in sub-paragraph (1) are –

- (a) the method known as “first in, first out” (FIFO);
- (b) the method known as “last in, “first out” (LIFO);
- (c) a weighted average price; and
- (d) any other method similar to any of the methods reflecting generally accepted best practice.

(3) Where, in the case of any company–

This version is out of date

- (a) the cost of assets falling to be included under any item shown in the company's balance sheet has been determined by the application of any method permitted by this paragraph; and
- (b) the amount shown in respect of that item differs materially from the relevant alternative amount specified in sub-paragraph (4),

the amount of that difference must be disclosed in a note to the accounts.

(4) Subject to sub-paragraph (5), for the purposes of sub-paragraph (3)(b), the relevant alternative amount, in relation to any item shown in a company's balance sheet, is the amount which would have been shown in respect of that item if assets of any class included under that item at an amount determined by any method permitted by this paragraph had instead been included at their replacement cost as at the balance sheet date.

(5) The relevant alternative amount referred to in sub-paragraph (4) may be determined by reference to the most recent actual purchase price before the balance sheet date of assets of any class included under the item in question instead of by reference to their replacement cost as at that date, but only if the former appears to the directors of the company to constitute the more appropriate standard of comparison in the case of assets of that class.

Substitution of original amount where price or cost unknown.

24. Where there is no record of the purchase price of any asset acquired by a company or of any price, expenses or costs relevant for determining its cost in accordance with paragraph 22, or any such record cannot be obtained without unreasonable expense or delay, the cost of the asset must be taken for the purposes of paragraphs 14 to 20 to be the value ascribed to it in the earliest available record of its value made on or after its acquisition by the company.

CHAPTER 4

(2) Subject to paragraphs 27 to 29, the amounts to be included in respect of assets of any description mentioned in paragraph 26 may be determined on any basis so mentioned.

(2) Tangible fixed assets may be included at a market value determined as at the date of their last valuation or at their current cost.

(3) Investments of any description falling to be included under Assets items 7 (Participating interests) or 8 (Shares in group undertakings) of the balance sheet format and any other securities held as financial fixed assets may be included either –

(a) at a market value determined as at the date of their last valuation; or

(b) at a value determined on any basis which appears to the directors to be appropriate in the circumstances of the company;

but where the value is that provided for in paragraph (b), particulars of the method of valuation adopted and of the reasons for adopting it must be disclosed in a note to the accounts.

Application of the depreciation rules.

27.(1) Where the value of any asset of a company is determined in accordance with paragraph 26, that value must be, or (as the case may require) be the starting point for determining, the amount to be included in respect of that asset in the company's accounts, instead of its cost or any value previously so determined for that asset, and the depreciation rules apply accordingly in relation to any such asset with the substitution for any reference to its cost of a reference to the value most recently determined for that asset in accordance with paragraph 26.

(2) The amount of any provision for depreciation required in the case of any fixed asset by sub-paragraphs (2) or (3) of paragraph 14 as it applies by virtue of sub-paragraph (1) of this paragraph is referred to in this regulation as the "adjusted amount", and the amount of any provision which would be required by that paragraph in the case of that asset according to the historical cost accounting rules is referred to as the "historical cost amount".

(3) Where sub-paragraph (1) applies in the case of any fixed asset the amount of any provision for depreciation in respect of that asset included in any item shown in the profit and loss account in respect of amounts written off assets of the description in question may be the historical cost amount instead of the adjusted amount, provided that the amount of any difference between the two is shown separately in the profit and loss account or in a note to the accounts.

Additional information to be provided in case of departure from historical cost accounting rules.

28.(1) This paragraph applies where the amounts to be included in respect of assets covered by any items shown in a company's accounts have been determined in accordance with paragraph 26.

(2) The items in the accounts affected and the basis of valuation adopted in determining the amounts of the assets in question in the case of each such item must be disclosed in the note on accounting policies.

(3) In the case of each balance sheet item affected, the comparable amounts determined according to the historical cost accounting rules must be shown in a note to the accounts.

(4) In sub-paragraph (3), references in relation to any item to the comparable amounts determined as there mentioned are references to—

- (a) the aggregate amount which would be required to be shown in respect of that item if the amounts to be included in respect of all the assets covered by that item were determined according to the historical cost accounting rules; and

- (b) the aggregate amount of the cumulative provisions for depreciation or diminution in value which would be permitted or required in determining those amounts according to those rules.

Revaluation reserve.

29.(1) With respect to any determination of the value of an asset of a company in accordance with paragraph 26, the amount of any profit or loss arising from that determination (after allowing, where appropriate, for any provisions for depreciation or diminution in value made otherwise than by reference to the value so determined and any adjustments of any such provisions made in the light of that determination) must be credited or (as the case may be) debited to a separate reserve (“the revaluation reserve”).

(2) The amount of the revaluation reserve must be shown in the company’s balance sheet under Liabilities item 11 in the balance sheet format.

(3) An amount may be transferred,

(a) from the revaluation reserve –

(i) to the profit and loss account, if the amount was previously charged to that account or represents realised profit; or

(ii) on capitalisation,

(b) to or from the revaluation reserve in respect of the taxation relating to any profit or loss credited or debited to the reserve,

and the revaluation reserve must be reduced to the extent that the amounts transferred to it are no longer necessary for the purposes of the valuation method used.

(4) In sub-paragraph (3)(a)(ii) “capitalisation” in relation to an amount standing to the credit of the revaluation reserve, means applying it in wholly or partly paying up unissued shares in the company to be allotted to members of the company as fully or partly paid shares.

(5) The revaluation reserve may not be reduced except as mentioned in this paragraph.

(6) The treatment for taxation purposes of amounts credited or debited to the revaluation reserve must be disclosed in a note to the accounts.

Assets and liabilities denominated in foreign currencies.

30.(1) Subject to the provisions of sub-paragraphs (2) to (7), amounts to be included in respect of assets and liabilities denominated in foreign currencies must be in sterling (or the currency in which the accounts are drawn up) after translation at an appropriate spot rate of exchange prevailing at the balance sheet date.

(2) If they are not covered or not specifically covered in either the spot or forward currency markets, an appropriate rate of exchange prevailing on the date of purchase may be used for assets held as financial fixed assets and assets to be included under Assets items 9 (Intangible fixed assets) and 10 (Tangible fixed assets) in the balance sheet format.

(3) An appropriate spot rate of exchange prevailing at the balance sheet date must be used for translating uncompleted spot exchange translations.

(4) An appropriate forward rate of exchange prevailing at the balance sheet date must be used for translating uncompleted forward exchange transactions.

(5) This paragraph does not apply to any assets or liabilities held, or any transactions entered into, for hedging purposes or to any assets or liabilities which are themselves hedged.

(6) Subject to sub-paragraph (7), any difference between the amount to be included in respect of an asset or liability under sub-paragraphs (1) to (4) and the book value, after translation into sterling (or the currency in which the accounts are drawn up) at an appropriate rate, of that asset or liability must be credited or, as the case may be, debited to the profit and loss account.

(b) they are derivatives.

(4) Financial instruments which under international accounting standards may be included in accounts at fair value, may be so included, provided that the disclosures required by such accounting standards are made.

(5) If the fair value of a financial instrument cannot be determined reliably in accordance with paragraph 32, sub-paragraph (1) does not apply to that financial instrument.

(6) In this paragraph—

(2) If a reliable market can readily be identified for the financial instrument, its fair value is determined by reference to its market value.

(3) If a reliable market cannot readily be identified for the financial instrument but can be identified for its components or for a similar instrument, its fair value is determined by reference to the market value of its components or of the similar instrument.

(4) If neither sub-paragraph (2) nor (3) applies, the fair value of the financial instrument is a value resulting from generally accepted valuation models and techniques.

(5) Any valuation models and techniques used for the purposes of sub-paragraph (4) must ensure a reasonable approximation of the market value.

Inclusion of hedged items at fair value.

33. A company may include any assets and liabilities that qualify as hedged items under a fair value hedge accounting system, or identified portions of such assets or liabilities, at the amount required under that system.

Other assets that may be included at fair value.

34.(1) This paragraph applies to—

- (a) investment property; and
- (b) living animals and plants.

(2) Such investment property and such living animals and plants may be included at fair value, provided that all such investment property or, as the case may be, all such living animals and plants are so included where their fair value can reliably be determined.

(3) In this paragraph, “fair value” means fair value determined in accordance with generally accepted accounting principles or practice.

Accounting for changes in value

35.(1) This paragraph applies where a financial instrument is valued in accordance with paragraph 31 or 33 or an asset is valued in accordance with paragraph 324.

(2) Despite paragraph 11 of Part 1 of Schedule 1 (Accounting principles), and subject to sub-paragraphs (3) and (4) below, a change in the value of the financial instrument or of the investment property or living animal or plant must be included in the profit and loss account.
